

Whippernock Creek “No Wake” Zone

Notice to all boat traffic on Lake Chesdin. A “No Wake” zone has been posted at the entrance to Whippernock Creek from the main lake where the creek narrows to a point just prior to the overhead power line crossing.

There is also a “No Wake” buoy installed at the southwest tip of the island at the entrance to Whippernock Creek.

These “No Wake” zones were added at both locations to reduce boat speed for limited sight distance and safety.
